Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 March 2010.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cottell (US 3,715,104) in view of Muller (US 2,615,692). Regarding claim 18, Cottell ('104) discloses an apparatus comprising a vessel (3); a vibrator (2,9) disposed in the vessel and having at least one surface with a predetermined area contacting the mixture components; a high-frequency vibration generator (1) connect to the vibrator, for vibrating the vibrator at high frequency in a direction perpendicular to said surface; and a reflector (10) detachably (see col. 4 lines 52-55) disposed on a bottom portion of the vessel, said reflector being arranged with a space from the vibrator at a small distance; and a drain pipe (5); wherein the reflector is provided with a perforation through the center area of the reflector and through the bottom portion of the vessel (see Figs. 2 and 4). A numerical value for the distance between the vibrator and the reflector is not provided by Cottell; however statement such as "spacing...is determined by micrometric thread" and "they are quite close together" (col. 5, lines 46-51) would have suggested that they are 10mm or less apart to one of ordinary skill in the art. Cone shaped pits are not disclosed. Muller ('692) teaches providing a vibrator with cone shaped pits (5). It would have been obvious to one of ordinary skill in the art to have provided the vibrator

of Cottell ('104) with cone shaped pits as taught by Muller ('692) to achieve the benefit of "extremely intense" mixing (see col. 2, lines 25-45).

Allowable Subject Matter

3. Claims 1, 2, 4 and 5 are allowed.

Response to Arguments

4. Only claim 18 remains rejected; the changed to claim 1 and corresponding arguments do not apply to claim 18. The reference to the "bottom portion of the vessel" in the claim does not set forth any relationship between claimed features. The overall orientation of the whole apparatus is a matter of use, not structure.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
